

SEEP BASIC COURSE

DAY ONE

8:00 am –5:00 pm

Nature of Erosion and the Water Cycle
Changes caused by development
Stormwater Erosion Regulatory Requirements
Local, State & Federal Sediment & Erosion Control Regulations

Site Assessment & Planning
Analysis of site characteristics
Best Management Practices
Installation, Inspection & Maintenance

DAY TWO

Field Session: 8:00 am – 12:00 pm
Exam for Certification – 1:30 pm

The field class will instruct participants to properly construct and install Best Management Practices for erosion and sediment control. Demonstrations will include proper installation of:

- Wattles
- Hydromulching
- Silt Fences
- Rolled Erosion Control products
- and more

REGISTRATION

Your confirmation of registration/payment; including classroom and field site address and directions will be mailed to you.

A Basic Seep Manual will be provided at the classroom session.

Fee & Cancellation Policy

Class fee: \$200

Register early as class size is limited.

One week cancellation notice required for full refund. No-shows are responsible for the full registration fee. Substitutions are always welcome.

What you don't know could cost you \$30,000 a day.

Stormwater/Erosion Control = \$\$\$ Saved

www.PanhandleSEEP.org

A construction site with poor Stormwater & Erosion Control management is an open invitation to an EPA Compliance Officer.

Save yourself time and money – do it right from the beginning.

Learn to use Best Management Practices (BMP) to your advantage.

Register for a SEEP Basic Course now.

See our website for details.
